SUMMARY

Full-stack developer with 2+ years of experience in Java, C#, Angular, and React.js. Currently expanding into Android and iOS development with hands-on work in Kotlin and SwiftUI. Strong in API integration, Agile teamwork, and system optimization. Background in Electronic Engineering supports a good understanding of hardware-software interaction.

SKILL

Programming

- Mobile: Kotlin, Jetpack Compose, SwiftUI, Dart
- Frontend: Angular, React.js, Bootstrap, TypeScript
- Backend: Java (Spring Boot), C# (.NET), Node.js
- Database: MySQL, DB2, MongoDB
- Tools: Git, Postman, CI/CD, Agile

Electronic and Design

- PLC
- Microprocessor and Interface
- Arduino

CERTIFICATE

- JavaScript: Algorithms and Data structure.
- Foundations of User Experience (UX) Design.
- Responsive Web Design. Wireframe Creation
- Applying Advanced LookML
- concepts in Looker
- Android Certified Application Developer
- Android Certified Application Engineer
- iOS & Swift - iOS App Development Bootcamp
- DevOps Foundation
- Digital Leadership

WORKING EXPERIENCE

Software Engineer
Heitech Padu. Bhd

September 2023 - Present

1. JPJ Teknologi Digital (Modernise)

Role: Angular Frontend Developer | Tech: Angular, Java, Spring Boot, DB2, REST API

- Replaced legacy Java ZUL UI with Angular to modernise JPJ's vehicle registration system.
- Built dynamic forms and dropdowns using Angular Reactive Forms.
- Integrated REST APIs and implemented state management with RxJS.
- Worked closely with backend team for seamless integration.
- Conducted UAT and resolved frontend issues post-migration.

2. JPJ Teknologi Digital (Maintaining)

Role: Backend Developer

- Tech Stack: Java, Spring Boot, DB2, REST APIs, Git
- Project Scope: Maintained and enhanced the backend features of the JPJ Teknologi Digital system, focusing on efficient CRUD operations and ensuring compatibility with frontend systems for vehicle registration and digital services.
- Achievements:
 - Optimised database queries, improving data processing speed and reducing system errors.
 - Conducted comprehensive UAT to assess system functionality, ensuring a smooth user experience.
 - Collaborated with the frontend team to ensure seamless API integration and worked within an Agile environment, contributing to daily Scrum meetings and sprint planning.
- Results: Successfully delivered key backend features on time, contributing to the smooth operation of the platform with enhanced performance and user satisfaction.

3. KPDRM (Project Revamp)

Role: Full-stack Developer

- Tech Stack: C#, .NET, SQL, REST APIs, Git
- Project Scope: Led the revamp of the KPDRM platform to modernise system architecture, streamline backend processes, and improve system performance.
- Achievements:
 - Redesigned and developed new webpage interfaces for improved user experience, ensuring compatibility between frontend and backend designs.
 - Optimised SQL queries, reducing data retrieval times by 30%, and integrated RESTful APIs to ensure seamless communication between system components.
 - Conducted comprehensive UAT, identifying and resolving critical bugs, leading to a 20% reduction in reported issues.
 - Collaborated with a cross-functional team in an Agile environment, actively participating in sprint planning, backlog refinement, and daily standups to ensure timely project delivery.
- Results: Improved overall system performance by 25%, significantly enhancing user experience and backend efficiency.

System Developer

Jun 2024 - Sep 2024

NIISE, IRIS CORPORATION BHD

- Role: System Developer
- Tech Stack: C#, .NET, ASP.NET, React.js, Java, SQL, REST APIs
- Project Scope: Re-engineered the company's immigration system product, focusing on connecting it with web APIs to enhance functionality, system performance, and data transmission.
- Achievements:
 - Reverse engineer fingerprint scanners with a web application using ASP.NET, enabling seamless interaction between the scanner and the web interface for secure user authentication.
 - Developed and implemented the backend API to handle fingerprint scanner input, ensuring smooth communication between hardware and the web application.
 - Challenges: The integration required real-time authentication, which was optimised by enhancing API performance and ensuring secure transmission of biometric data.
- Backend JSON Extraction from PDF – JavaScript, React.js, TypeScript
 - Built a robust backend system to extract and parse JSON data from PDF files using JavaScript, ensuring accurate data retrieval and formatting for front-end display.
 - Developed a frontend sample using React.js and TypeScript to display extracted JSON data, providing users with a clean, interactive interface.
 - Implemented validation mechanisms to ensure data consistency and reduce errors during PDF parsing.
- Technical Documentation for SDLC
 - Created comprehensive technical documentation for the Software Development Lifecycle (SDLC), covering phases such as requirement analysis, system design, testing, and deployment.
 - Documented best practices for API integration and system troubleshooting, serving as a reference guide for future development teams.

Software Developer (Internship)

Jul 2022 - Jan 2023

BRAVONET SDN. BHD

Working as Front End Dev

Accomplishments:

Tech Stack: Bootstrap, JavaScript, CSS, Git, GitHub, Agile, CI/CD

Project Scope:

- Contributed to the development of a web prototype using modern frontend technologies.
- Built interactive and responsive web pages using Bootstrap and JavaScript with cross-browser and mobile compatibility.
- Participated in Agile ceremonies including daily standups, sprint planning, reviews, and retrospectives.
- Collaborated with senior developers to identify and fix frontend bugs, enhancing UI quality and performance.
- Gained experience with CI/CD pipelines, assisting in code deployment and testing workflows.
- Conducted client-server testing to validate frontend performance and adherence to design specs.
- Created technical documentation for workflows, onboarding, and best practices.

EDUCATION

UNIVERSITI MALAYSIA PAHANG

2019 - Jan 2023

Bachelor of Engineering, major in Technology Electronic (Computer System)

AIESEC (O R G A N I S A T I O N)

Director of Outgoing Global Volunteer

Key Responsibility:

- Board meetings with executive to review and track progress
- Provide training members on our OGV team job scope or task given
- Provide customers support and IR Partner support (HE) at all stages process
- Explore new target market to promote IR partners projects

EXCO DISCIPLINE AND SAFETY

Perwakilan Mahasiswa Residen Pelajar 4 (PEKA 4)

Key Responsibility:

- Board meetings with executive to review and track progress.
- Provide training members on our Peka team job scope or task given in event.
- Public Relations with safety organisation for "fired-real" event.
- Make sure students in resident 4, knew the S.O.P and act for discipline issues.

POLITEKNIK KOTA BHARU

2015 - 2018

Electronic (Communication System), Engineering

REFERENCE

- En. Abu Yazid (Project Manager, Heitech Padu), 019 - 3106468
- Mohd Suhairi bin Ahmad Soobni (Technical Lead for NISe Project), 016 - 3165869
