Electronic Engineer background with software development experience, I possess a strong foundation in digital electronics, microprocessors, and communication systems. Additionally, my expertise in both web development and embedded systems has provided me with extensive knowledge in low-level programming and hardware-software interactions.

EDUCATION

UNIVERSITI MALAYSIA PAHANG

Bachelor of Engineering, major in Technology Electronic (Computer System)

2019 - 2023

POLITEKNIK KOTA BHARU

Electronic (Communication System), Engineering

2015 - 2018

WORK EXPERIENCE

HEITECH PADU. BHD

Software Engineer (6 Oct 2023 - Present)

Key Responsibility

- Lead the conceptualisation and implementation of dynamic UI/UX designs, streamlining the creation of new webpage interfaces
- Handle a role in backend development, ensuring robust functionality and compatibility with front-end designs (CRUD)
- Engaged in comprehensive User Acceptance Testing (UAT) procedures to validate system performance and user experience
- Facilitated project progression through adept utilisation of Agile methodologies, particularly Scrum, optimising team collaboration and efficiency
- Leveraged extensive experience in C#, and SQL data management, and system troubleshooting. **(Full Stack: C#, Java)**

NIISE, IRIS CORPORATION. BHD

Software Engineer (6 June 2023 - 21 Sep 2023 Retrenchment)

Key Responsibility

- Connect Fingerprint scanners with Web API for interacting from the web page using ASP.NET.

SKILLS

Electronic and Design

- PLC
- Microprocessor and Interface

Simulation Software

- AutoCad
- SolidWork
- Proteus (Electronic Design)

Software Developer

- Wireframe Creation
- Front End Coding
- Back End Coding
- API
- Database
- UI/UX

CERTIFICATE

- JavaScript: Algorithms and Data structure.
- Foundations of User Experience (UX) Design.
- Responsive Web Design. Wireframe Creation
- Applying Advanced LookML concepts in Looker
- Exploring Data with Looker
- Google Cloud Essential

PROGRAMMING

Front-End Programming

- CSS
- React.js
- Bootstrap
- Typescript

Back-End Programming

- C# (Dotnet)
- C++
- Javascript
- node.js
- next.js
- SQL
- Java/Dart

IDE

- Microchip Studio
- Visual Studio
- VSCODE
- Robotic R.O.S
- Arduino IDE
- Google Colab

- Build Backend to extract JSON data from PDF file using Javascript and a Frontend sample for display JSON data using React.JS and TypeScript.
- Create documentation Technical for Software Development Lifecycle (SDLC).

BRAVONET SDN. BHD

Software Developer (INTERNSHIP 8 August 2022 - 08 Jan 2023)

Key Responsibility

- Developed Web prototype project using Bootstrap, Javascript, CSS programming language.
- Learned software engineering process improvements and best practices. CI/CD and Agile development.
- Assisted with testing of client-server network components.
- Documented technical workflows and knowledge to educate newly hired employees.
- Supported development, User Acceptance Testing (UAT) and user experience staff to develop new products.
- Worked with developers to identify and remove software bugs.
- Tested new applications for usability and adherence to code plan.
- Experience using git and github

LEADERSHIP EXPERIENCE

AIESEC (ORGANISATION)

Director of Outgoing Global Volunteer

Key Responsibility:

- Board meetings with executive to review and track progress
- Provide training members on our OGV team job scope or task given
- Provide customers support and IR Partner support (HE) at all stages process
- Explore new target market to promote IR partners projects

EXCO DISCIPLINE AND SAFETY

Perwakilan Mahasiswa Residen Pelajar 4 (PEKA 4)

Key Responsibility

- Board meetings with executive to review and track progress.
- Provide training members on our Peka team job scope or task given in event.
- Public Relations with safety organisation for "fired-real" event.
- Make sure students in resident 4, knew the S.O.P and act for discipline issues.
