

Haniff Hamdan

Java | .NET | React | Angular | API Integration | System Optimization

Putrajaya, Malaysia • +60179019951 • haniff.hamudan@gmail.com

Summary

Full-stack developer specializing in building and optimizing scalable web applications using Java, C#, and modern frontend frameworks. Demonstrated expertise in API integration, system performance optimization, and Agile delivery. Strong foundation in electronic engineering with hands-on experience integrating hardware and software systems.

Experience

Full-Stack Developer, 09/2023 - Current

Heitech Padu. Bhd

Project: JPJ Teknologi Digital

- Developed and maintained backend services using Java (Spring Boot) to support vehicle registration and licensing systems
- Optimized DB2 database queries, improving processing efficiency and reducing data inconsistencies
- Built and executed integration tests to validate API functionality and ensure system reliability
- Collaborated in Agile sprints, contributing to backlog refinement, sprint planning, and cross-team delivery

Project: KPDRM System Revamp

- Redesigned and modernized legacy system architecture using C# (.NET) and REST APIs
- Improved SQL query performance, reducing data retrieval time by approximately 30%
- Developed responsive frontend components aligned with backend architecture for improved UX
- Led UAT testing cycles, identifying critical issues and reducing production defects by 20%

System Developer, 06/2023 - 09/2023

NIISE, IRIS CORPORATION BHD

- Engineered backend APIs using C# and [ASP.NET](#) to process biometric data from fingerprint scanners
- Integrated hardware authentication systems with web applications for secure real-time verification
- Enhanced API performance to support high-speed, secure biometric data transmission
- Re-engineered immigration system modules, improving system functionality and scalability

Software Developer Intern, 07/2022 - 01/2023

BRAVONET SDN. BHD

- Developed responsive web interfaces using JavaScript, Bootstrap, and CSS with cross-browser compatibility
- Collaborated with senior developers to debug and resolve UI issues, improving application performance
- Participated in Agile ceremonies including sprint planning, standups, and retrospectives
- Supported CI/CD processes by assisting in build, testing, and deployment workflows

Education

Bachelor of Engineering, Technology Electronic (Computer System), 2019 - 2023

Universiti Malaysia Pahang,

Electronic Engineering (Communication System), Electronic (Communication System), 2015 - 2018

Politeknik Kota Bharu,

Skills

- Full-Stack Development
- Java (Spring Boot)
- React.js & Angular
- Microservices Architecture
- CI/CD Pipelines (GitHub Actions)
- Linux & NGINX Administration
- Test-Driven Development (TDD)
- Hardware-Software Integration (IoT, MQTT)
- RESTful API Development & Integration
- C# (.NET / ASP.NET)
- SQL & Database Optimization
- Agile / Scrum Methodology
- Docker & Kubernetes (K3s)
- System Performance Optimization
- Frontend Development (TypeScript, Bootstrap)

Certifications and Licenses

JavaScript Algorithms and Data Structures
Foundations of User Experience (UX) Design
Responsive Web Design
Wireframing and Prototyping
Advanced LookML Concepts (Looker)
Android Certified Application Developer
Android Certified Application Engineer
iOS & Swift – App Development Bootcamp
DevOps Foundation Certification
Digital Leadership

Achievements

Reverse engineered fingerprint scanner integration with [ASP.NET](#) web applications, enabling secure and seamless user authentication
Developed backend APIs to process biometric input, ensuring reliable communication between hardware devices and web systems
Optimized API performance to support real-time authentication and high-speed data processing
Strengthened data security by implementing secure transmission protocols for sensitive biometric information

Websites and Social Links

Portfolio: haniffhamdan.com
LinkedIn: <https://www.linkedin.com/in/haniffhamdan97/>

Leadership & Program Experience

AIESEC – Director, Outgoing Global Volunteer

- Led team operations, training, and stakeholder engagement
- Managed customer experience and international partnerships

PEKA 4 – Discipline & Safety EXCO

- Coordinated safety initiatives and compliance awareness programs
- Collaborated with external organizations for large-scale events
